Ramkumar Ketti Moorthy

Dallas, TX | kmramkumar210@gmail.com | LinkedIn

Professional Summary

- Full Stack Engineer over 11 years of experience in designing and delivering scalable, high-performance solutions for frontend a nd backend systems.
- Proficient in developing robust applications using Java, Spring Boot, Node.js, Angular, React, and Python.
- Leveraged hands-on AI-assisted tools to reduce development time by 60%.
- Expertise in building comprehensive REST APIs and integrating with cloud platforms such as Google Cloud and AWS.
- Experienced in automating infrastructure using Terraform.
- Skilled in designing event-driven distributed microservices and system architectures for enhanced performance, reliability, and maintainability.
- Proficient in data structures, algorithms, system design and problem-solving.
- Consistently applies skills to improve product efficiency, scalability, and end-user experience.

Skills

- **Programming Languages**: Java, JavaScript, TypeScript, Python, C#, Kotlin
- **AI Tools**: Claude Code, Codex, GitHub Copilot.
- **Web Technologies**: Angular, React, Bootstrap, jQuery, Angular Material, Material UI, HTML5, CSS3
- **Frameworks & Libraries**: Spring, Spring Boot, Hibernate, Spring Data JPA, J2EE Web services, Microservices, .Net, JBoss Fuse
- **Cloud & DevOps**: Google Cloud, AWS, OpenShift, Terraform, Docker, Kubernetes, Azure DevOps, Jenkins, CI/CD
- **Databases**: SQL, Oracle, MS SQL Server, IBM DB2, Google Datastore, SSMS
- **Tools & Others**: REST/SOAP, Agile, JUnit, Dynatrace, Splunk, Kafka, GraphQL, IntelliJ, Eclipse, VS Code, Visual Studio, TFS, GitHub, Maven, Apache Tomcat, Nginx, SonarQube, Figma

Experience

IBM

Lead Software Engineer — Feb 2019 - Present | Dallas, Texas

- Architected and delivered 10+ **scalable backend microservices** in **Java + Spring Boot**, powering enterprise-scale APIs serving millions of requests per day with 99.9% uptime.
- Owned end-to-end development of backend features including **API design, caching strategies, and database optimization**, improving system scalability and reducing latency.
- Enhanced backend performance by implementing caching frameworks, reducing database I/O by ~60% and achieving 40–50% faster response times in high-traffic production environments.
- Partnered with Product Managers, Designers, and Frontend Engineers to conceptualize features with a **user-first approach**, ensuring seamless integrations across client and backend systems.
- Built **cloud-native applications** leveraging Google Cloud, AWS and automated provisioning with **Terraform**, enabling faster, cost-efficient deployments.
- Engineered **REST APIs and integrations with external platforms**, enabling secure, real-time data synchronization across multiple applications.
- Mentored 5 junior developers, conducted **peer code reviews**, and improved team coding standards and system health.
- Led **Angular v21** modernization initiative, delivering 20+ **reusable UI components** that reduced frontend development time by 25% across future product features.
- Strengthened production systems by remediating critical security vulnerabilities, optimizing Jenkins and GitLab CI/CD pipelines and reducing average build-to-deploy cycle time by 40%.

TRANSCENTRA FTS

Software Engineer — Jan 2017 - Jan 2019 | Chennai, India

- Adopted Angular in migrating a legacy application from JSP/JSTL to a modern frontend framework, emphasizing maintainability and full-stack development integration.
- Delivered Angular feature modules (lazy loading, reactive forms, interceptors) that improved application responsiveness and reduced user-reported UI bugs by 35%.
- Developed robust web services to facilitate efficient communication between client and server, reinforcing a **distributed microservices** approach.
- Resolved **cross-browser compatibility** and alignment issues across Chrome, Firefox, Safari, and IE11, achieving consistent UI rendering across 95% of target browser/device combinations.
- Leveraged Maven and Tomcat for efficient build processes and deployment, supporting continuous integration and deployment workflows.

FULL CREATIVE

Java Developer — Nov 2015 - Dec 2016 | Chennai, India

- Completed an intensive 6-month full-stack training program covering Java, Spring, Backbone, and cloud fundamentals, transitioning immediately into a contributing developer role.
- Seamlessly integrated 3 third-party services via **OAuth 2.0**, ensuring smooth authentication and data interchange.
- Built and deployed an email notification system that automated user activity alerts, reducing manual follow-up overhead by an estimated 20% for the operations team.
- Launched a To-Do list web application using Backbone.js, jQuery, Google App Engine, and Google Datastore — delivered end-to-end as a solo project within 4 weeks.

Education

Madurai Institute of Engineering & Technology | Bachelor of Engineering, CSE **2015**

Certification

- **AWS Certified AI Practitioner** **View Credentials**
- **Google Certified Associate Cloud Engineer** **View Credentials**
- **Red Hat Certified Specialist in Containers** **View Credentials**
- **Microsoft Certified on Azure Fundamentals** **View Credentials**
